Number of clients

Financial performance

Driven by our effective strategy and efforts of the MTI team, the company consistently achieves high financial performance.

Revenue

Project-oriented distribution

MTI specializes in the implementation of corporate projects, and also offers to its clients a full package of professional services for the implementation of project solutions by using server and network equipment, data storage systems, personal systems, uninterruptible power supply systems, presentation equipment, etc.

Professional team of certified managers and technical experts experienced in implementing projects in various sectors of the economy

Direct contracts with leading global manufacturers make it possible to carry out projects of the highest complexity

Preparation of technical tasks and development of detailed technical specifications

Selection of optimal logistic schemes and offering the best financial conditions

Warehouse support

Project support by the vendor.

Service support

MTI Hi-Tech Engineering technical center is a separate subdivision of the MTI company that provides warranty and post-warranty repair services for corporate customers of MTI and end consumers.

The company entered into contracts with many manufacturers of equipment and created a fully functional network of partner service centers in cities with a population of more than 100,000 inhabitants.

MTI Hi-Tech Engineering focuses on the development of servicing for the B2C segment, in particular for those equipment brands which, according to contracts with vendors, should be serviced by MTI as a distributor.

What makes us stand out from others?
